THE NORTHSIDE INTERNSHIP

Summer Programming

Program Sponsorship Opportunities

The Northside Summer Internship connects students from North Minneapolis high schools with hands-on experiences at the University of Minnesota.

This is not your typical summer job. Our interns gain hands-on experience in IT infrastructure, computer support, programming, analytics, and data science. Alongside these technical skills, they learn essential life skills such as cooking, budgeting, interviewing, and engage in sustainability through our reuse and recycling facilities.

We provide daily meals, laptops, and collaborate with local housing and social services to ensure every student has support and stability.

Why Sponsor the Northside Summer Internship Program?

Building Well-Rounded Leaders
Our program is comprehensive. From field research, life skills, tech-skills, through on-the-job training and world-class instruction.

Enhancing High School Education with Real-World Experience
We partner with high schools like PYC to connect classroom learning with the real world.

Community Engagement and Impact
Our interns mentor summer camp children, assist senior citizens with technology, and engage deeply with the community.

Long-Term Benefits
Our interns develop a wealth of practical experience, setting them up as highly skilled professionals for the future.

For more information, please visit our website at **NorthSideInterns.umn.edu** or contact us at **northside-interns@umn.edu** or 651-338-2157.
